Summary

Motivated, driven, and passionate software engineer. Lifelong learner, organized and goal oriented, my passion lies in the details. Seeking a growing role with a high performing team that encourages continued education.

Technical Skills

JavaScript, TypeScript, React, Redux, Jest, HTML, CSS, Sass, Styled-Components, AJAX, Axios, Restful APIs, .NET, C#, Postman, PostgreSQL, Jenkins, Agile and Remote Development Environments

Experience

Software Engineer II - LeaseQuery - Atlanta, Ga - July 2021 - Current
- Built modern and accessible systems from the ground up using React and TypeScript
- Contributed to company-wide Design System and Reusable Component Library
- Ensured quality through code reviews, and testing throughout the CI/CD pipeline
- TypesScript, React, Next.js, Sass, Jest, Figma, Jenkins, Storybook, .NET, C#

Software Engineer I - LeaseQuery - Atlanta, Ga - July 2020 - July 2021
- Work directly with product and design teams building value-adding features
- Helped to launch new products as well as redesign/update existing products

Cellarman - Orpheus Brewing - Atlanta, Ga - May 2018 - March 2020
- Implemented quality control structure and worked to continuously improve efficiency and safety

General Manager - Octane Coffee - ATV - Atlanta, Ga - June 2016 - May 2018
- Oversees all aspects of operation, leading a team of twelve employees
- Worked directly with Regional Manager to increase sales and implement a profitable bar program
- Successfully trained new employees on general practices and customer service

Education

Digital Crafts — Full Stack Software Immersive Bootcamp — 16 weeks — 2020

Valencia College — Associate in Arts — General Studies

Projects

Yums - June 2020 - React-Native, Axios, CSS
- iOS app built with React-Native using React hooks. The app allows users to search for local restaurants and sorts the results based on price range. Clicking on a restaurant allows you to view their location, ratings and photos of their menu items

SocialHound - July 2020 - React, Redux, Firebase, Heroku
- Social networking platform for dog owners. Allows connecting with others based on geographical location. Built as a capstone project with three other developers in a remote environment
- Real time chat, public and private feeds, Google map integration, custom avatar upload
